THE INDIAN TERRITORY.

Government Inspector Calls Attention to the Chaotic Condition Scounse of Each of Contralined Authority,

Washington, Nov. 28.—The annual report of the United States Indian inspector for Indian territory calls attention to the fact that the territory, embracing nearly 20,000,000 acres, is owned in common by citizens of the various tribes, comprising Indians, negroes and inter-married whites, aggregating 84,750 people, including freed-men, within the borders of which also are located some 350,000 whites or non-citizens who have no title to property and are without representation in the government of the territory. Until the lands are appraised and allotted by the commission to the five civilized tribes, lands in townsites disposed of and tribal governments have become extinct, certain laws of Arkansas are extended over Indian territory. Federal laws apply in all other instances and the secretary of the interior is charged by law with en-forcement of rules and regulations governing other matters. Such a condition renders affairs so complicated that it is not surprising when courts and eminent lawyers differ as to the proper construction of the law that people are frequently at a loss to determine what laws apply or who is authorized to enforce them.

MORE FROM JUDGE TAFT.

He Says the Philippines Are the Best Pac sessions in the Orient for Purposes of Trade Development.

Cincinnati, Nov. 28 .- In a private letter just received from Judge Taft, president of the Philippine commis sion, spenking of the resources and needs of those islands, he says:

With these islands completely pacified, they are far and away the best possessions in the orient for purposes of trade and development. Their climate is better than the climate of any other is better than the climate of any other trapical country of which I know, and the capacity for agriculture, mineral and commercial development would neem to be unlimited. Even with the unsettled candition of the country, as it is, the tonnage of the vessels coming into the harbor of Manija, excluding the government transports, is double of what it ever was in Spanish times, and the same thing is true of the inter-bland tonnage. thing is true of the inter-island tonnage. With the construction of roads and railroads through these islands the opportunities for development cannot be exaggerated. One of the things that is needed here is the introduction of American ican business methods. The establishment of two or three large American business houses here (retail and wholessle) would do wooders for the business standards of

WILL KEEP ISLE OF PINES.

Whatever May He the Disposition of Cubs. Uncle Sam Is to Retain This Stratagle Territory.

Washington, Nov. 28 .- The United States will retain possession of the Isle of Pines, whatever be the fimal disposition of Cuba. It will be fortified and a strong garrison will be kept there. Lying immediately south of the western end of Cubs, the Isle of Pines commands the western or Yucatan entrance to the gulf and forms an important outpost for the defense of the Nicaragua canal. While Secretary Root visited Cuba he went to the island and recognized its strategic importance. The state department now holds that under the treaty of peace the title to the Isle of Pines passed to the United States.
